## MATH MOUNTAINS

Math Mountains is perfect for working with fact families. In Math Mountains, the total (greatest number) is always at the top of the mountain. You can start with any of the missing numbers to create and solve problems of your choosing. Math Mountains will help students see the relationship between addition and subtraction. When a correct fact family has been entered, the circles will display as green. If the numbers do not form a correct fact family, the circles will display as red. Numbers can be changed as much as needed, and a user can also reset the screen to start over.
